OBJECTIVE

Computer Science undergraduate passionate about backend and mobile app development. Skilled in Node.js, Express, and Flutter with experience in building responsive, user-friendly interfaces. Seeking an online internship to contribute to real-world projects and enhance my technical skills.

PROJECT EXPERIENCE

Coffee App UI – Flutter (Frontend Practice Project) 2025

- Designed mobile app UI to display coffee items with ratings and descriptions
- Included search functionality and interactive item views
- Focused on Flutter widget structure and visual layout (frontend only)

Notes Website – Node.js + Express (In Progress) 2025

- Designed a web app using Node.js, Express, HTML, and CSS
- Set up routing and EJS views to serve dynamic pages
- Organized app structure with modular routes for maintainability

Notes App - Node js+ Express JS (Database using MongoDB in progress)

- Designed a Notes website for interactive user interfaces and implemented Backend using Node and Express JS. In progress for storing all the data in DB.

Airbnb Website - NodeJS + Express JS

- Built an Airbnb website including all the pages and performed CRUD.
- Integrated Database as well such as MongoDB for storing large data.

EDUCATION

Currently in Bachelor of Computer Science Expected Graduation: 2027

Pakistan Global Institute, Rawat

- Current CGPA: 3.92
- 4th Semester Completed

ICS (Math, Physics, Computer Science) 2023-2024

Askaria College, Girls Wing Saddar Campus, Rawalpindi

- Marks Obtained: 963

KEY SKILLS

- Good communication and teamwork abilities.
- Eagerness to Learn
- Adaptability to new technologies and work environment.
- Time Management and ability to handle multiple projects efficiently
